Marijuana is one of the most widely used substances during pregnancy in the United States. Emerging data on the ability of cannabinoids to cross the placenta and affect the development of the fetus raise concerns about both pregnancy outcomes and long-term consequences for the infant or child. Social media is used to tout the use of marijuana for severe nausea associated with pregnancy.

Marijuana Use During Pregnancy and Breastfeeding ...

Australian National Breastfeeding Strategy 2010 - 2015
How to start breastfeeding. The first time you hold your newborn in the delivery room is a great time to start breastfeeding. At the beginning, your body will produce small amounts of a special milk called colostrum that will help protect your baby from infection. (Your baby's tummy is very tiny, so she only needs these small amounts to fill up.

Breastfeeding: Getting started | BabyCenter
As lactation specialists are aware, the key to successful breastfeeding is a proper "latch-on" and swallow by the infant as described by Woolridge, 11 Escott, 12 Weber, 13 and Bosma. 14 During effective latch-on, the infant draws both the nipple and some of the surrounding areolar tissue into the mouth and extends the tongue over the lower gum pad...

4 Developing review questions and planning the evidence review. At the start of guideline development, the key issues and draft questions listed in the scope should be translated into review questions and review protocols.. Review questions define the scope of the review and therefore must be clear and focused.
