Concrete Building Pathology
Sessions/Tracks. Track 1: Steel Concrete Composite Structures: Structural members that are made up of two or more different materials are known as composite elements. The main benefit of composite elements is that the properties of each material can be combined to form a single unit that performs better overall than its separate constituent parts.

These maps of central Berlin show the location of the Führerbunker site (in red). The map on the left is part of a 1939 Berlin city atlas (Berliner Morgenpost - "Berlin in der Tasche") - the Führerbunker is shown behind and partly beneath the old Reichs Chancellery building (the Vorbunker was beneath the reception hall in the rear of the building).
